User's Guide
model 28512

⚠ **CAUTION:** When using telephone equipment, there are basic safety instructions that should always be followed:
Refer to the Important safety instructions section in this book and save them for future reference.
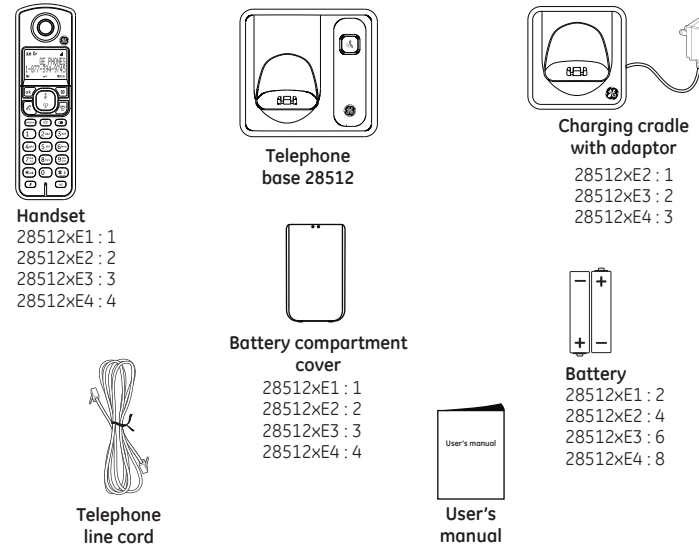

This 28512 telephone is compliant with the DECT™ standard. It is designed to transmit and receive telephone calls and be collected to the certain public telephonic networks.
*DECT is the trademark registered by ETSI.

IMPORTANT: Because cordless phones operate on electricity, you should have at least one phone in your home that isn't cordless, in case the power in your home goes out.

Installation

Important Installation Guidelines
- Avoid sources of noise and heat, such as motors, fluorescent lighting, microwave ovens, heating appliances and direct sunlight.
- Avoid areas of excessive dust, moisture and low temperature.
- Avoid other cordless telephones or personal computers.
- Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.
- Never touch non-insulated telephone wires or terminals, unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.
Installing the phone

Telephone base and charging cradle installation
Install the telephone base and charging cradle(s) as shown below. Make sure that the electrical outlet is not controlled by a wall switch.
If you have DSL high speed internet service, a DSL filter is required (not included). Contact your DSL service provider for more information about DSL filter.

Telephone Jack Requirements
To use this phone, you need an RJ11C type modular telephone jack, which might look like the one pictured here, installed in your home. If you don't have a modular jack, call your local phone company to find out how to get one installed.

Wall plate

Modular telephone line jack

⚠ **CAUTION:** Use only the power adaptor that came with this unit.
(Base: IA5060, 100-240Vac/6Vdc/500mA.
Charger: IA5060, 100-240Vac/6Vdc/500mA).
Using other power adaptors may damage the unit.
Installing the Handset Battery
⚠ **CAUTION:** To reduce the risk of fire or personal injury, use only the CCT Tech Global Limited approved Nickel-metal Hydride battery (Ni-MH), which is compatible with this unit

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

1. Make sure the battery compartment cover is not attached with the handset.
2. Insert the AAA rechargeable batteries as shown on the engraving in the battery compartment.
3. Align the cover against the battery compartment and slide it upwards until it clicks into place.
4. Charge the handset by placing it in the telephone base. The light on the handset is on when charging.
Please Fully Charge Before Using!
For optimum battery performance, charge the battery for 16 hours before use.

6. LCD will show "CONFERENCE"

Changing the battery

⚠️ **CAUTION:** To reduce the risk of fire or personal injury, use only the CCT Tech Global Limited approved Nickel-metal Hydride battery (Ni-MH), which is compatible with this unit.

1. Make sure the telephone is **OFF** (not in TALK model before you replace the battery.
2. Remove the battery compartment door.
3. Disconnect the cord attached to the battery pack and remove the battery pack from the handset.
4. Insert the new battery pack and connect the cord to the jack inside the battery compartment.
5. Put the battery compartment door back on.
6. Place handset in the base or handset charge cradle to charge. **Allow the handset battery to properly charge (for 16 hours) prior to first use or when you install a new battery pack. If you do not properly charge the phone, battery performance will be compromised.**

Battery Safety Precautions

• Do not burn, disassemble, mutilate, or puncture. Like other batteries of this type, toxic materials could be released which can cause injury.
• To reduce the risk of fire or personal injury, use only the battery listed in the User's Guide.
• Keep batteries out of the reach of children.
• Remove batteries if storing over 30 day

General product care

To keep your unit working and looking good, follow these guidelines:
• Avoid dropping the handset, as well as other rough treatment to the phone.
• Clean the phone with a soft cloth.
• Never use strong cleaning agents, paint thinner, abrasive powder, alcohol, or other chemical products to clean the unit. Doing so will damage the finish.
• Retain the original packaging in case you need to ship the phone at a later date.
• Periodically clean the charge contacts on the handset and base with a clean pencil eraser.

Troubleshooting guide

Telephone general use

Problem	Cause/solution
The handset does not turn on even after installing battery pack	- Place the handset on the base unit or charger to turn on the handset.
The unit does not work	- Make sure the battery pack is installed correctly. - Fully charge the battery. Check the connections. (for 16 hours) - Unplug the base unit's AC adaptor to reset the unit. Reconnect the adaptor and try again. - The handset has not been registered to the base unit. Register the handset.
Cannot hear a dial tone	- The base unit's AC adaptor or telephone line cord is not connected. Check the connections. - Disconnect the base unit from the telephone line and connect the line to a known working telephone. If the working telephone operates properly, contact our service personnel to have the unit repaired. If the working telephone does not operate properly, contact your service provider/telephone company. The ringer volume is turned off. Adjust the ringer volume.
Handset does not ring	- The handset may be out of range of the base. Move closer to the base. - The handset may be out of range of the base. Move closer to base.
You experience static, noise, or fading in and out	- You are using the handset or base unit in an area with high electrical interference. Reposition the base unit and use the handset away from sources of interference.

Caller ID

Problem	Cause/solution
Caller information is not displayed	- You must subscribe to Caller ID service from your service provider/telephone company. - If your unit is connected to any additional telephone equipment such as a Caller ID box or cordless telephone line jack, plug the unit directly into wall jack. - If you use a DSL/ADSL service, we recommend connecting a DSL/ADSL filter between the base unit and the telephone line jack. Contact your DSL/ADSL provider for details - The name display service may not be available in some areas. Contact your service provider/telephone company for details. - Other telephone equipment may be interfering with this unit. disconnect the other equipment and try again.
Caller information is displayed late	- Depending on your service provider /telephone company, the unit may display the caller's information at the 2nd ring or later. - Move closer to the base units.
The 2nd caller's information is not displayed during an outside call	- In order to use Caller ID, call waiting, or Call Waiting Caller ID (CWID), you must first contact your service provider/telephone company and subscribe to the desired service.

Important safety intructions

Some of the following information may not apply to your particular product; however, when using telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
4. Telephones should not be used while you are in a bathtub, shower or pool. Immersion of the telephone or handset in water could cause an electrical shock.
5. Slots and openings in the cabinet back or bottom are provided for ventilation, to protect it. from overheating. Do not block or cover these openings. Do not block the openings by placing the product on a bed, sofa, rug, or other similar surface. Do not place this product in a built-in installation unless proper ventilation is provided.
6. Only operate this product from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.
7. Plug the adaptor into an easily accessible electrical outlet near the equipment.
8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be abused by persons walking on it.
9. Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.
10. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.
11. Never spill liquid of any kind on the product.
12. To reduce the risk of electric shock, do not disassemble this product. If service or repair work is required, take it to a qualified serviceman. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
13. Do not expose the product to extreme temperatures such as areas near a hot radiator, stove or in a hot car. Do not place product upon other consumer electronic products such as; computer monitors, power amplifiers, etc.
14. Do not place lighted candles, cigarettes, cigars, etc., on the telephone.
15. Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
16. Never install or modify telephone wiring during a lightning
17. Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.
18. Use caution when installing or modifying telephone lines to prevent electrical shock and/or fire.
19. Under the following conditions, unplug this product from the wall outlet and refer servicing to qualified service personnel:
   A. The power supply cord or plug is damaged or frayed.
   B. The product has been exposed to rain or water.
   C. The product does not operate normally by following the operating instructions.
   D. The product's cabinet has been damaged.
   E. The product exhibits a distinct change in performance.
20. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
21. Do not use the telephone to report a gas leak in the vicinity of the leak.
22. Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
23. Only use attachments/accessories specified by the manufacturer.
24. Unplug this apparatus during lightning storms or when unused for long periods of time.

IF YOUR PRODUCT UTILIZES BATTERIES, THE FOLLOWING ADDITIONAL PRECAUTIONS SHOULD BE OBSERVED:

1. Use only the type and size battery(ies) specified in the user manual.
2. Do not use this product if the battery door is removed or missing.
3. Replace batteries that appear to be swollen or have damaged wiring.
4. Do not dispose of the battery(ies) in fire. They may explode. Check with local codes for possible special disposal instructions.
5. Do not open or mutilate the battery(ies). Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
6. Exercise care in handling battery(ies) in order not to short out the battery(ies) with conducting materials such as rings, bracelets, and keys. The battery(ies) or conductor may overheat and cause burns.
7. Do not attempt to recharge the battery(ies) provided with or identified for use with this product that are not rechargeable. The battery(ies) may leak corrosive electrolyte or explode.
8. Do not attempt to rejuvenate the battery(ies) provided with or identified for use with this product by heating them. Sudden release of the battery(ies) electrolyte may occur causing burns or irritation to eyes or skin.
9. When replacing battery(ies), all batteries should be replaced at the same time. Mixing fresh and discharged batteries could increase internal cell pressure and rupture the discharged battery(ies). (Applies to products employing more than one separately replaceable primary battery.)
10. When inserting battery(ies) into this product, the proper polarity or direction must be observed. Reverse insertion of battery(ies) may result in leakage or explosion.
11. When inserting battery(ies) into this product, do not twist or pinch the wires or allow wires to become pinched in battery door.
12. If storing over 30 days, remove battery(ies) from this product because the battery(ies) could leak and damage the product.
13. Discard "dead" battery(ies) as soon as possible since "dead" batteries are more likely to leak in a product.
14. Do not store this product, or the battery(ies) provided with or identified for use with this product, in high-temperature areas. Batteries that are stored in a freezer or refrigerator for the purpose of extending shelf life should be protected from condensation during storage and defrosting. Batteries should be stabilized at room temperature prior to use after cold storage.
15. If your product uses rechargeable battery(ies), charge the battery(ies) only in accordance with the instructions and limitation specified in the User Guide.

Environment

Used equipment must be disposed of in compliance with current environmental protection regulations. You should return it to you reseller or dispose of it in an approved recycling centre.

Do not attempt to open the batteries as they contain chemical substances. In the event of leakage, avoid contact with the skin, eyes and mouth. In the event of contact, rinse the affected part for several minutes in running water. Clean the product with absorbent paper or a dry cloth and contact your reseller for replacement batteries.
